March Well Woman Day

Community Partners - In March, Mercy Clinic partnered with TCU Medical and Pre-Health students as well as the UT Southwestern Moncrief Cancer Institute to offer free mammograms and well woman exams to our patients. We are grateful to our volunteers as well as our community partners.

Career Opportunity

We are looking for a part-time hourly Business Manager to work with our team. Details available on our website under Who We Are.

Interested applicants should submit their resume and cover letter to mercyclinic@mercy-clinic.org with Business Manager in the subject line. No phone calls will be accepted.

Provider Open House Success!

Earlier this month we welcomed more than 30 health care providers through our doors to see Mercy Clinic in action. We got to walk them through triage, the lab, and exam rooms while they heard from our volunteers about the many different types of providers we need to keep the Clinic serving the Fort Worth community every day.

Again and again we heard from these new-to-us providers that they're excited to join us in our mission to care for the underserved in South Fort Worth!

"I've actually had my Health Care Provider Application filled out since 2020 but just never got around to sending it in. I'm looking forward to getting started!"

- one of the physicians who attended the Open House

We can't provide without our people: physicians, dentists, nurses, medical assistants, phlebotomists, pharmacists, dental assistants, and more. This event is over but there are always opportunities to check out the Clinic for yourself and invite your provider friends.

Come see why everyone thinks volunteering at Mercy Clinic is so fun and rewarding!

To set up a provider tour contact Lorena Montalvo at lorenamontalvo@mercy-clinic.org or 817-840-3501.

Patient Story

20 years ago, I came to this community and started participating in the benevolence program. There I met Pastor Anthony and other people from Travis who were always very kind and very nice people. I remember meeting Lorena there when she was a young girl as she helped in the benevolence house.

A few years later, when Mercy Clinic opened its doors to offer medical services to the community I had the opportunity to be a patient. To my surprise, one of the people who was at the clinic was Lorena, the young lady I met in benevolence!

The people who work there are very kind, they have compassion for the people who need it the most. They assisted me with my thyroid and helped me find a specialist doctor for my Parkinson's. Not just my medical needs, they also put me in touch with the community ministry where I received spiritual advice, prayer and Bible studies. They gave me craft classes and I met other people like myself. To this day, my sister still participates in the sewing classes that the community ministry offers.

I am very grateful to the clinic for the free care they provide to the people who need it and I ask God to continue guiding them and bless them for everything they do. They are wonderful people.

-Maria Ines De La Cruz
